Projects

E-commerce Site   *Maech 2023 - April 2023*
Created a fully functional E-commerce site using MERN stack in which a merchant can put their products on our store and user can buy products.

- An attractive UI is created using REACTJS and CSS.
- Created an API using NODEJS with using modern technology like JWT authentication token and used MONGODB as database.
- Used various Nodejs modules like Multer and Sharp to upload and resize images.

Web Chatting Application   *December 2022 - January 2023*
Web application for users to instantly communicate with each other and most important part of chat application is focused on the data flow on web.

- Using React as our frontend technology to make UI for the chat application
- Used firebase as our backened technology.

Text-Manipulator   *November 2022*
It is a web app in which you can convert your text to uppercase, lowercase, remove extra spaces and many other functionalities.

- Reactjs is used to develop the whole app.
- You can also enable Dark mode, check how many words, chr you have written etc.

Extracurricular activities

Tutored Students: Maths , Java   *November 2022*
Taught 40+ students at a school.
Teached students Maths for exams and concepts of java at a NGO school.
